MECANICA RELOCATES TO NEW OXNARD OFFICES

Oxnard, CA July 16, 2018 - Mecanica Scientific Corporation (Mecanica), an engineering and scientific analysis firm, today announced it has moved into new corporate offices at 3051 Sturgis Road, Oxnard, CA to accommodate rapid company growth. Mecanica also recently established an office in Carlsbad, CA to provide services to clients in Southern California. Formed in 2014, Mecanica has grown from two to over twenty employees as it serves private and public sector clients in transportation, manufacturing and automotive industries.

“This is an exciting time for Mecanica. The relocation and expansion mark a milestone for the company, its employees and customers” said Mecanica’s CEO and Principal Scientist, John Steiner.

Located in the McInnes Ranch Business Park, minutes from the beach, Mecanica’s new corporate headquarters is situated among a diverse collection of high energy, cutting edge companies. The location also provides its employees a quality work environment within the pleasant surroundings of Oxnard, California.

“We are committed to providing our employees an engaging environment that enables them to offer our clients quality service,” remarks Kathy Curry, Director of Administration. “The open floor plan and additional space of the new offices in Oxnard support our collaborative, work ethic.”

Mecanica serves clients in Northern and Southern California. It also provides service to clients in Canada and Mexico.

Mecanica Scientific Services Corporation is a scientific and engineering consulting firm providing engineering and scientific analysis services to the legal, automotive, commercial truck, bus manufacturing, transportation and transportation research industries.
